

SAI 123 – SUMMARY OF KANEBA PRODUCTS

Design Support

Providing prospective Alucobond users at project concept stage with the information needed to consider their options and at design stage with technical support required to correctly specify and document Alucobond systems so that it is suitable for a building consent application. Kaneba provide information required by Territorial Authorities, product information and colour samples. We also review drawings and provide detail development support where requested.

Quotations

Kaneba provides quotations to clients for the respective products or services listed in this summary.

Supply Alucobond on an indent basis

The most cost effective manner for Alucobond fabricators to source Alucobond material for their project.

Supply Alucobond or associated products ex stock

Where ordering quantities and available lead times are insufficient to order material on indent Alucobond can be supplied from Auckland stock – subject to limited sheet sizes, core materials and surface finishes.

Popular Alucobond colours and core materials are available ex stock. We also stock the cleaning agent recommended in the Alucobond Maintenance Guidelines.

Kaneba Limited Terms of Trade for Products and Services apply to all the content of this document.
